

Easy Wash **JUMBO FOAM**

Safe on Polished Aluminium for washing cars and trucks.

Easy Wash JUMBO Foam has been designed especially for Australian conditions. Created extra foam which prevents drying of the product during washing. This is very soft and safe on aluminium wash agent which cause's demagnetization of dirt. Also, contains substances which inhibit the corrosion by forming a protective layer on the bodywork. Gives a water-repellent and shining coachwork because of its special composition with 9 different components. (pH: 10)

Instructions for use

Can be used with fogging systems, spray arches, high pressure cleaners and foam systems. Works best with Pressure Cleaners 2500-3000 Psi 12-15 L per minute or more.

APPLICATION

1) **Sprayers:** very dirty vehicles: dilution 1 to 20 (1 to 20 L. water). Spray from bottom upwards. Let it soak for about 60 seconds and spray off with high pressure hose. For less dirty vehicles, **a dilution of 1 to 25 or 50 will do.** Apply in the same manner.

2) **With a foam unit:** the use and dosage strongly depends on the used system but **Easy Wash JUMBO Foam** will fit any foam unit **1:100 dilution**

Foam from bottom to top, leave for one minute; wash the same way from bottom to top with plenty of water under pressure. Using foam method, **one person** washes the truck no longer than 15 minutes.

(for more information our technical service 1300 733 211).

3) **High Pressure Cleaner:** dilution 1 to 10. Adjust the dosage tap till the results are satisfying, **about 0,5% to 2%** at the sprayer head and an ideal water temperature of 50°C.

4) **Manual cleaning:** normally **1% dilution, 1 litre to 100 litres water.** Wash vehicle with sponge or brush. After finishing, rinse again with plain water.
